

Ask what is Need	First Step of the Engineering Design Process
Imagine the Solution	Second Step of the Engineering Design Process
Plan (Using Drawings & Models)	Third Step of the Engineering Design Process
Create a Prototype	Fourth Step of the Engineering Design Process
Improve my Design	Fifth Step of the Engineering Design Process
Prototype	a Test model of a product (working model)
A damaged Bridge has been repaired, what is the next step of the Engineering Design Process?	Test the strength
A prototype has been created what is the next step	Test and Evaluate if it is effective (works as intended)
Making an Hypothesis in the Scientific Method is the same as _____ In the Engineering Design Process	Imagine the Design or Solution
Ask What is the need is the same in the Engineering Design Process as which step in the Scientific Method	Making an observation to Ask a Question
